

**HERCULES**  
COMPLETE LIFTING SOLUTIONS

# ECOBARROW

Hercules is proud to introduce a new range of Electric Wheelbarrows, the **ECOBARROW**.

This new electric wheelbarrow is small enough to fit into very confined spaces, yet powerful enough to carry 120kg up a 12 degree slope. This is a job even two strong men would have great difficulty in achieving.

All wheels are pneumatic, so the **Ecobarrow** can be used on virtually any surface.

When fully charged the motor can run for up to 2 hours on level ground, and naturally less on sloping ground—depending on how steep the slope is. Should longer run times be required, we can supply additional snap in batteries.

The EWB 120G can achieve this through its advanced carbon brush hub motor which is extremely efficient, and at the same time very quiet in its operation.

This eco friendly machine can be used manually without the need to use the motor. The **Ecobarrow** freewheels when the motor is not in use. There is also a powerful disc brake ensuring safety when descending steep slopes.

This unit comes as:

- \* Standard with a **powder coated steel 120 litre bucket (EWB-120G)**.
- Option of a **120 litre plastic bucket (EWB-120P)**.
- Option of a **120 litre flatbed tray (EWB120T)**.
- Flatbed tray dimension is 120 mm high, 930-980 mm in length and 700-800 mm in width.
- This long flat tray with removable sides allows a larger object to be carried.

SPECIFICATIONS		EWB-120G / EWB-120P / EWB-120T
Max Load Capacity	(kg)	120
Max Speed (Full Load)	(km/h)	3.5
Max Slope	(Degrees)	12
Dimensions	(L, W, H) (mm)	1400/770/920
Charging Time	(Hrs)	6-10
Run Time Per Full Charge	(Hrs)	Up to 2hrs continuous on level ground
Weight of main Structure and steel Tray		41.5kg
