BRIO

In spite of its small size, the Brio is a very sturdy electric wheelbarrow, thanks to the steel chassis which is powder coated with exterior paint. Its level of performance is surprisingly high and its operating duration is guaranteed for a full working day. You will never get tired of loading and discharging the Brio, even when travelling long distances. It is ideal for small construction jobs, even on scaffolding, gardening or any type of work where transporting loads of up to 200Kg is required.

SPECIFICATIONS	Brio
Capacity - flat surface	200kg
Capacity - on a 30% slope	150kg
Overall length	1130mm
Width between wheels	750mm
Overall height	380mm
Tilting device	Manual
Weight	80kg
Engine	300 Watt / 24 Volt
Drive	Diff. in oil bath
Forward speed	max 4 km/h
Reverse speed	max 2 km/h
Speed Regulation	with potentiometer
Control panel	Analogic
Batteries	40 amp

The Brio is supplied with on/off keys, a potentiometer to adjust the speed forward/reverse and is guided with a lever system and an extra red lever for safety which allows it to work only in the presence of assigned personnel. It is equipped with an emergency stop, led to verify the charging level with an acoustic detector in case of low level battery, and an external plug for a fast and easy connection to the charger. The 300W motor has an electromagnetic brake that stops the Brio accidentally slipping while on ramps up to 30% with a full load. The gears in oil bath avoid any kind of maintenance and the machine can be cleaned easily without causing short circuits thanks to the controller and the well cabled wires kept in an hermetic ambient. The manual tilting system of the Brio gives the possibility to equip and change rapidly different types of accessories depending on the expected use.
