STEP RIDER STAIRCLIMBER

The Step Rider Stairclimber can out perform any other stair climbing device on the market today. It is a proven system used for over thirty years, in many applications, throughout the world.

The Step Rider Stairclimber is an advanced system and provides all of the essential stairclimbing and installation functions. Moving loads up or down stairs and around tight landings is accomplished easily and with minimal effort.

Features

- ◆ Available in two different models.
- ◆ Lift capacity of 800kg or 1500kg.
- ◆ Dual chain drive and automatic brake provide additional safety.
- ◆ Durable aluminium frame.
- ◆ Non-marking urethane treads.
- ◆ Available in A/C or A/C-D/C power.
- ◆ Adjustable handle.
- ◆ Remote control switch.

STEP RIDER STAIRCLIMBER

HERCULES
COMPLETE LIFTING SOLUTIONS

Swivel Dolly

Expanda Landing A

Used to expand the first landing outward for coming onto and off extremely small landings, with large loads. In many cases it becomes possible to move loads that are actually larger than the landing itself.

Size: Width 660mm
Depth 430mm

Big Wheel Attachment

Four large wheels mount quickly to the Step-Rider. Allows loads to be rolled over extremely rough terrain.

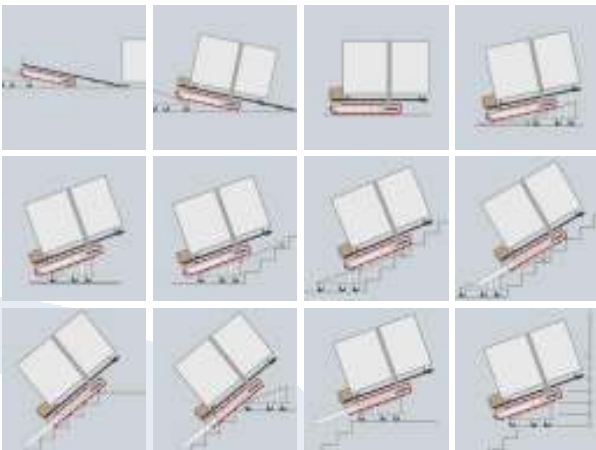

Expanda Landing B

Used to expand landing width when turning on narrow landings. Especially useful when performing 90 or 180 degree turns. In most instances it makes it possible to move loads which are actually larger than the landing. Comes with 4 adjustable non-marking polyurethane feet.

Size: Width 660mm
Depth 915mm

Angle Dolly and approach plate

Aluminum Stairs
