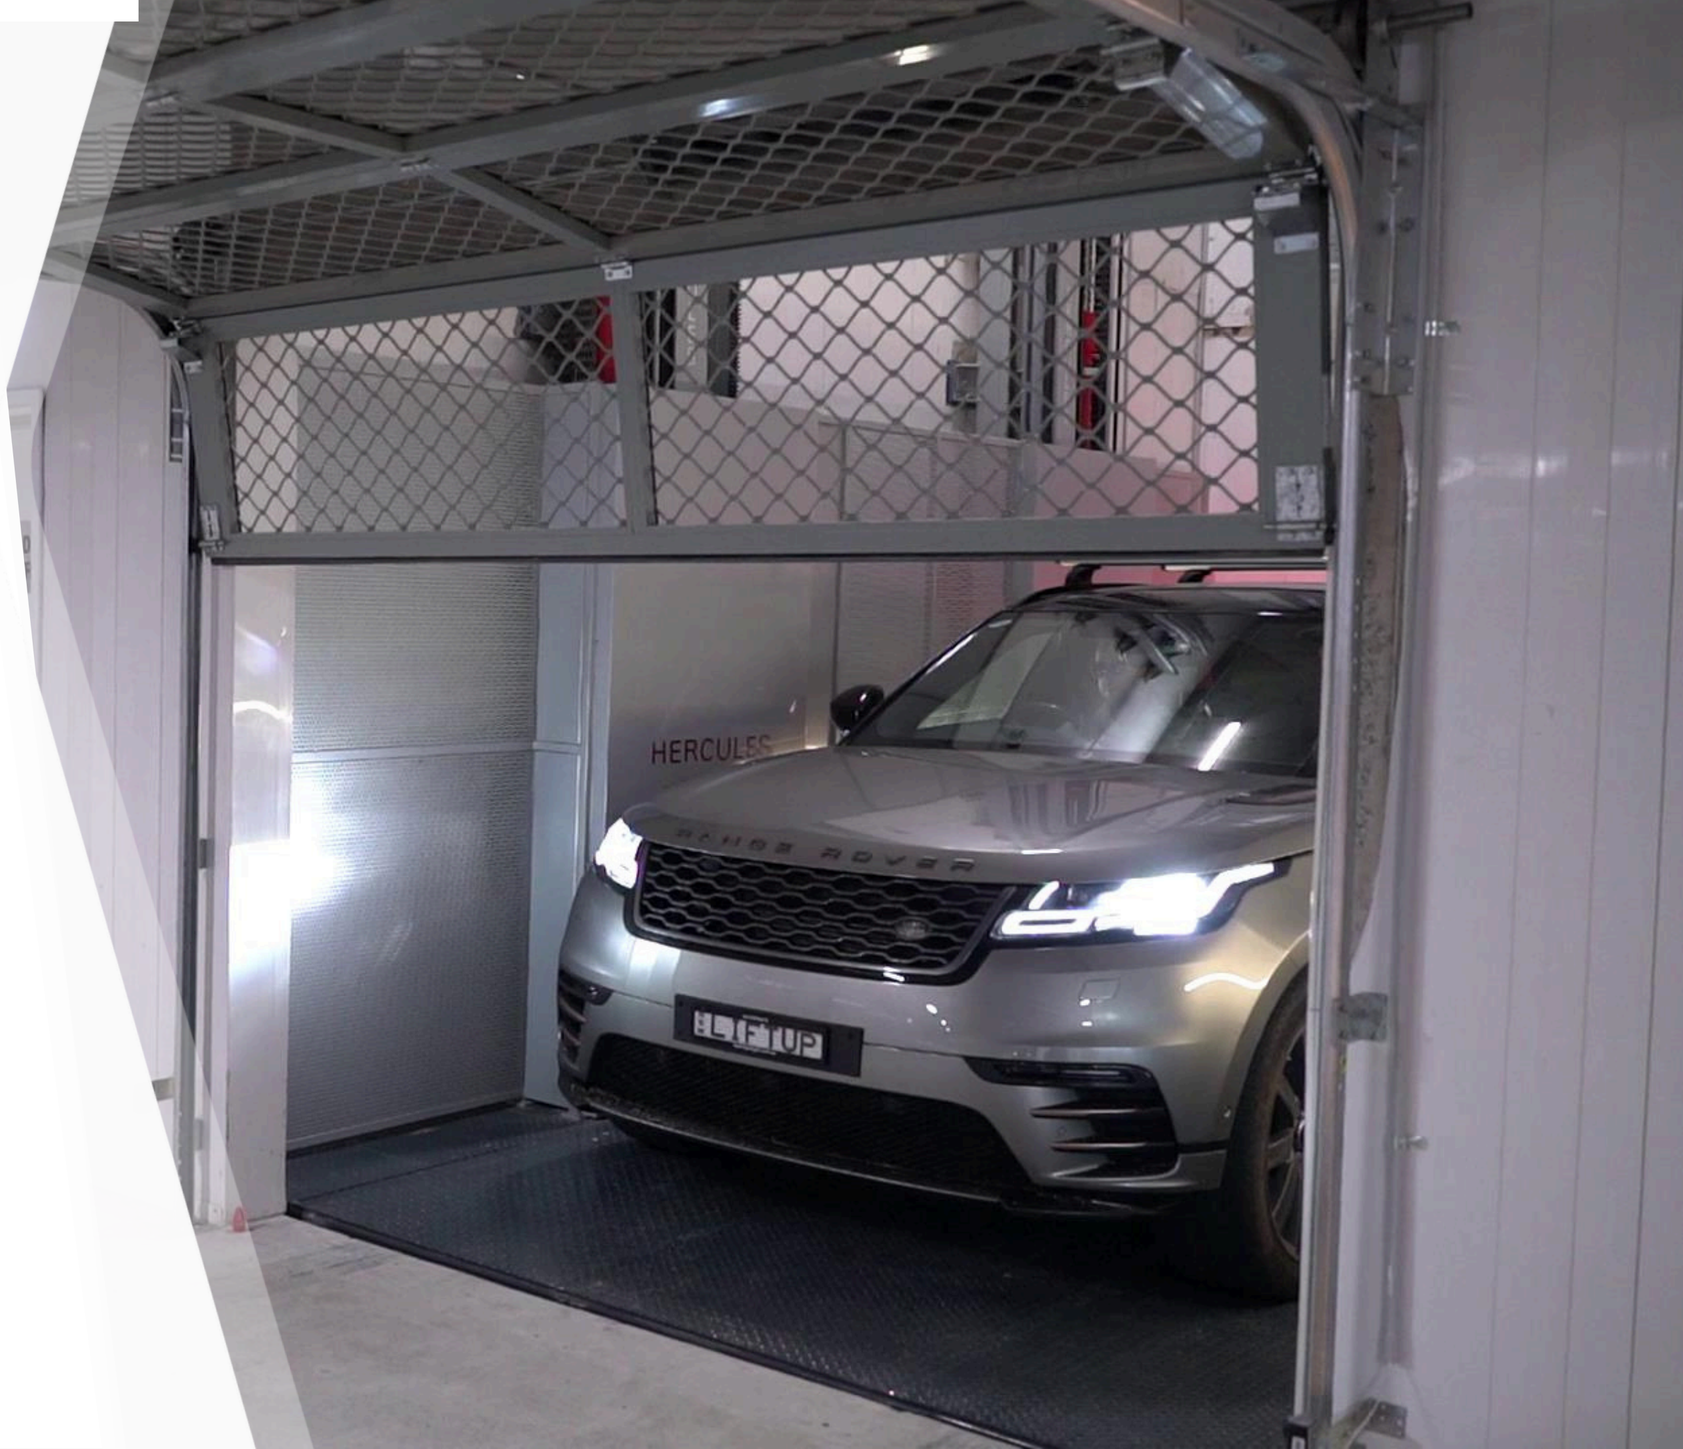
CAR LIFTS AND HOISTS

COMPLETE LIFTING SOLUTIONS



For the past fifteen years, Hercules Complete Lifting Solutions has been providing space-efficient vehicle storage for both residential and commercial applications. We design, import, install and service Dependent and Independent systems as well as Car Lifts and Turntables. Uniquely an Australian owned and based car parking company, we are fully committed to the Australian market.

Specialising in customised solutions for every conceivable parking requirement, using products sourced from around the world, our customers are not restricted to a 'one size fits all' approach.

Our management team of fully qualified engineers based here in Australia can attend meetings at your convenience and design a carparking solution to meet your unique requirements. Hercules understands the importance of professional project management on every job, no matter the size or scope. We have often been told we say 'Yes' more often than our opposition do, We focus on functionality, safety, reliability, efficient and sustainable technologies and cost-effectiveness.

Our management, engineers, designers, project managers and administrators are available 24/7 to liaise with you on your project. We are very proud of our knowledgeable, friendly and professional team of experts.

Be assured that Hercules is involved in every step of the process, from design to installation, to servicing and maintenance agreements.

Why choose a Hercules Car Lift/Hoist?

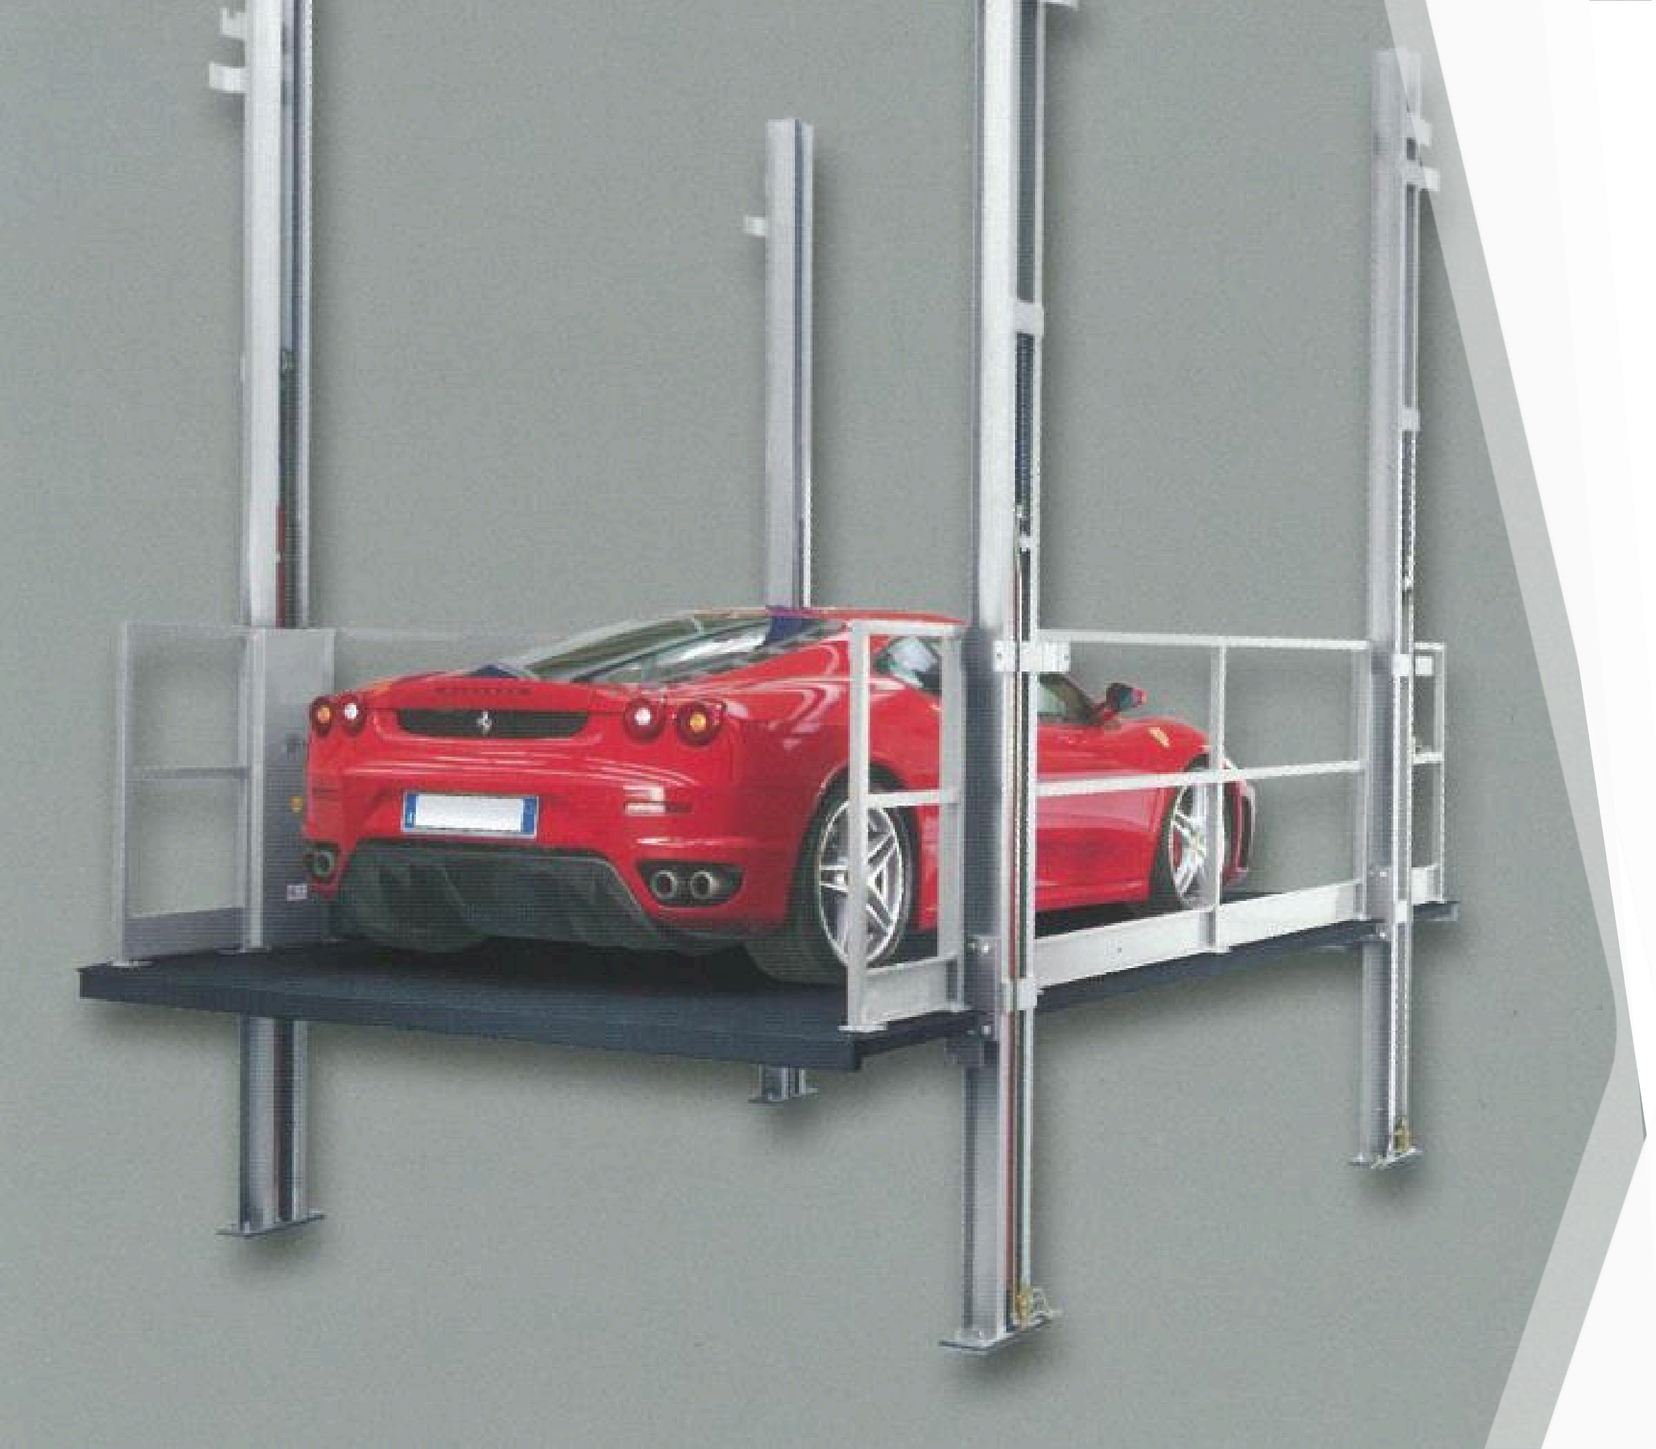
Vehicle Lifting Platforms

Hercules Passenger Rated Vehicle Lifts are ideal for eliminating ramps, the compact lift design doesn’t require any overhead motor rooms and only requires a shallow pit depth of 250mm.

The systems are aimed to replace the traditional access ramps, thus saving on digging costs and gaining room for car manoeuvring.

The compact lift designs are a superb space saver. All dimensions of the lift are customizable and there is no limitation for the platform size.

These lifts can also be designed to accommodate large trucks.



Space Saving Technology

Looking for a fully enclosed lift, a high-speed wire rope lift or a multi-passenger Hydraulic Lift? **Contact Hercules Complete Lifting Solutions today, as we** can provide anything required. We tailor design our lifts to your parking needs.

The lift is designed to Australian Standards and is fitted with all mandatory safety equipment.

The steel structure can also be fully galvanised to protect the lift against harsh environments such as salty water or other contamination which may affect the structure. The galvanisation also reduces future maintenance requirements.

Made just for you

TRAVEL DISTANCE

- Single Stage Car Hoist

4m travel distance

- Double Stage Car Hoist

6.5m travel distance

- 2 Column Car Hoist

12m travel distance

- 4 Column Car Hoist

25m travel distance

- Wire Rope Car Lift

the sky is the limit

DOORS

We can help source doors for the internal garages and the façade. Door integration is included in commissioning.

ROOF COVERS

We also offer a wide variety of finishes to the vehicle hoist. For example, the platform or roof can be tiled or decorated to match the surrounding floor finish, making a flush and unnoticeable hoist. Customisation is welcomed and we will design to any requirement or limitation you may have. For example, this hoist can be fitted with an inbuilt turntable, allowing for multiple angled entry and exit points and eliminating reversing.
