Dependent Systems

Hercules Dependent Systems are the simplest form of car stacker, where the car or cars on the ground level are removed in order to retrieve the upper cars.

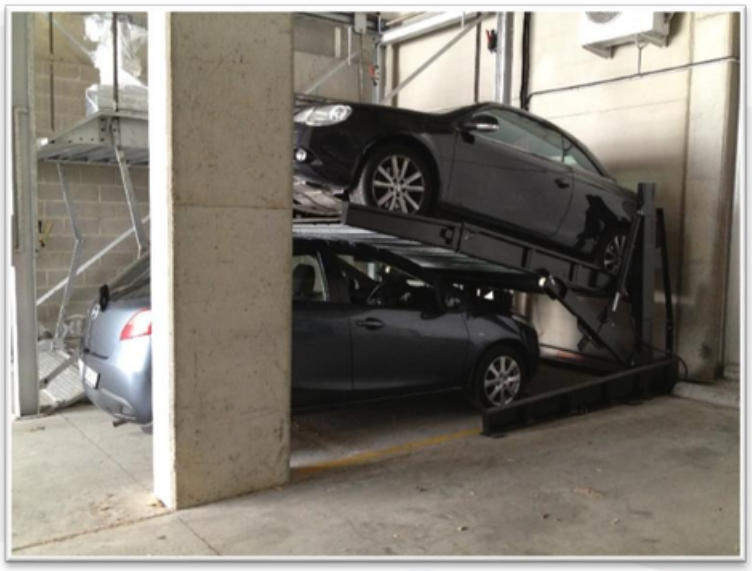
The dependent system can come in many shapes and sizes:

- Angle Stackers
- 2 Post Double
- Stackers 4 Post
- Double Stackers
- Triple Stackers
  Quad Stackers

ANGLE STACKERS

The Hercules Angle Stacker Series is perfect when there is not enough height available to accommodate two cars in the one carpark space above ground.

Designed for low ceiling height. The sleek design and strong, galvanised construction guarantee safety, durability and the utmost protection of both the cars and drivers/passengers. The simplicity
of operation, and it's economic and practical design make the
Angle Stacker the unchallenged leader in the field of safe car parking practices.



TWO POST DOUBLE STACKER

The Hercules Double Stacker Seriesis the ultimate car parking solution to accommodate two cars inthe one carpark space above ground. The dependent double stacker is a kind of valet parking, it means the car or cars on the groundlevel are removed in order to retrieve the upper cars.

Platform can be stopped at different heights to accommodate for various vehicles & ceiling heights

Hercules Lifting Solutions reserves the right to alter any specifications without notice. Hercules Carparking Systems reserves the right to use different technologies, systems, processes, procedures or standards in the fulfillment of their obligation to the customer (provided the customer derives no disadvantage).

FOUR POST DOUBLE STACKER

The Hercules Double Stacker Seriesisthe ultimate car parking solution to accommodate two cars in the onecarpark space above ground. The dependent double stacker is a kindofvalet parking, it means the car or cars on the ground level are removedinorder to retrieve the upper cars.

Platform can be stopped at different heights to accommodate for various vehicles & ceiling heights

TRIPLE STACKER

Our Hercules Above GroundTriple Stacker is the most effective way to triple the capacity ofatypical parking area. It moves only vertically making the machineadependent machine, meaning the users must clear the carsonlower levels to get a higher-
level car down.

The four-post stacker parking lift can be installed indoors or outdoors. The parking system shares legs to allow for better space utilization and stronger structural design.

QUAD STACKER

Our Hercules Above Ground Quad Stacker is the most effective way to quadruple the capacity of a typical parking area. It moves only vertically making the machine a dependent machine, meaning the users must clear the cars on lower levels to get a higher-level car down.

The four-post stackerparking lift can be installed indoors or outdoors. The parking system shareslegs to allow for better space utilization and stronger structural design.
